STEM OPT valid through 2027 — Open to hybrid and remote roles

PROFESSIONAL SUMMARY

Bilingual (EN/ES) BI Analyst with hands-on experience building reporting systems from scratch. I focus on connecting data to business decisions. Automating manual processes with SQL and Power BI, and translating numbers into insights that sales and operations teams actually use. Currently working at a Miami-based distribution company where I built the entire BI infrastructure from zero.

CORE SKILLS

Analytics & Visualization: Power BI (DAX, Power Query), SQL, Advanced Excel, Sage ERP

Business & Strategy: Sales Forecasting, Profitability Analysis, KPI Definition, Revenue Operations (RevOps), Market Analysis

Tech & Automation: AI-Enhanced Workflows, KQL (Azure Log Analytics), Data Governance, Process Automation

Languages: English (Fluent) - Spanish (Native)

WORK EXPERIENCE

Business & BI Analyst — Sep 2024 – Present

AMG Global Distribution | Miami, FL

- Built the company's BI infrastructure from scratch, replacing manual Excel workflows with an automated SQL + Power BI system that cut reporting time by 80%.
- Created a profitability model to track margin at the SKU level across domestic and international sales, improving data accuracy by over 25%.
- Used KQL (Azure Log Analytics) to monitor which reports were actually being used, helping the team focus on what mattered and drop what didn't.
- Worked closely with Sales and IT to define KPIs for inventory and revenue tracking. Making sure the dashboards answered real business questions.

IT Assistant & SQL Report Writer — Intern — Jan 2024 – May 2024

Missouri Valley College | Marshall, MO

- Wrote and optimized SQL queries for the Argos BI system, improving data accuracy and report speed by 15% for university staff.
- Documented IT support workflows and troubleshooting guides, reducing resolution time for 100+ users.
- Supported the database team with data integrity checks and user access management during enrollment periods.

RELEVANT PROJECTS

Sales & Profitability Dashboard — AMG Global Distribution

Power BI · SQL Server · DAX · Sage ERP

- Built a central dashboard connecting directly to SQL to track sales in real time across domestic and international markets.
- First time the company had visibility into real per-product margins. Directly used for pricing and purchasing decisions.

Note: visuals shown in portfolio use anonymized data and representative mock figures to protect business confidentiality.

BI Usage Tracking System Internal Initiative

KQL · Azure Log Analytics · Power BI Service

- Wrote KQL scripts to analyze Power BI activity logs and measure which reports were being used, by whom, and how often.
- Helped leadership make data-driven decisions about which analytics tools were worth maintaining.

Operations & Request Management System Workflow Optimization

Notion · Agile · Process Documentation

- Set up a Kanban-style system to track data requests and prioritize work — replaced an informal email-based process.
- Created SOPs for data governance that gave leadership a clear view of what the BI function was delivering.

Personal Data Portfolio — Deployed on Vercel Personal Project

React · TailwindCSS · AI-Assisted Development

- Built and deployed a responsive portfolio site (juan-portfolio-bi.vercel.app) with SEO optimization and structured data for recruiter and AI discoverability.

EDUCATION

Postgraduate Specialist in Artificial Intelligence 2025

Racks Academy | Spain

Focus: Generative AI for Business, LLM Integration, Data Strategy.

B.S. Computer Information Systems & Computer Science (Double Major) 2024

Missouri Valley College | Marshall, MO

Minor: Business Administration | GPA: 3.3
